Wireframes

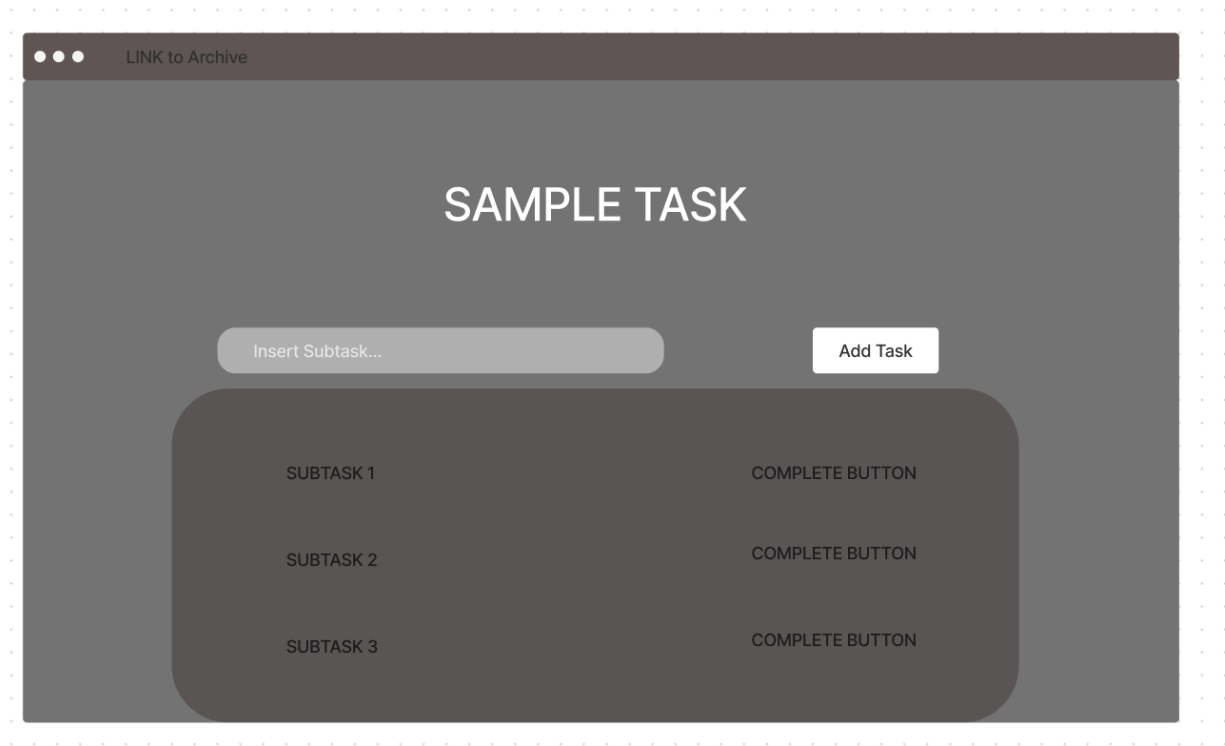

1. HOME/ Insert Task

-In this view, the user will be able to add main tasks with their corresponding due date, I ended up implementing a filter on the main page so the user can see what tasks are do within the next couple of days.

2. Subtask View

-In this view, the user will see the main task selected at the top and the user will be able to add subtasks, which should make the task at hand easier to handle and break down.

3. Task Archive View

-In this view, the user is able to see all tasks that have been completed.

4. Task Calendar View

-In this view, the user is able to see their tasks laid out in a calendar view to see what tasks will be due when.
